

Shelf & Rack Systems:

Solo

Solo may rightfully be referred to as a universal system. It can be integrated into walls and partitions. Universal also, because Solo can be applied in any type of store and because the system offers an extensive amount of accessories.

Karro

Karro consists of a basic tubular frame, Ø 60 mm, perforated on four sides; all accessories are adjustable in height. Karro can be combined infinitely and can be applied in various types of stores. Karro can be finished in any colour, so any store style or environment can easily be adapted. Karro has a broad range of accessories which, dependent on the product, can be attached to the side, to the front or to the rear of the structure.

Shelf & Rack Systems:

Duo

Duo is also a universal system that is available for various applications, varying from presentation and division walls to gondola style solutions. The positioning of the structural wall, between the floor and the ceiling, turns Duo, into an aesthetic solution, as a result of the veiled functioning. Duo can also be applied at any type of store and has an extensive amount of accessories.

F-Line

F-Line has a chic, powerful yet minimalistic style and is highly suitable to, among others, display clothing in an exclusive manner. The basis of this flexible system consists of a hanging rail, also referred to as F-Line, which can be delivered in 625 and 1000 mm. The system may easily be expanded with accessories such as coupling beams and panels, executed in stainless steel K2.320.
